

- Step1: First convert your audio file to .flac format using the link: (<https://audio.online-convert.com/convert-to-flac>)

With the settings:

- Change sampling rate: 16,000 Hz
  - Change audio channels: Mono
- 
- Step2: Install the CORS extension in your browser.  
([Extension For Chrome](#))(Use only Google Chrome to run the page.)
- 
- Step3: Open the file convert.html in your browser by double-clicking on it (preferably on google chrome).
- 
- Step4: Click Choose File and choose your file to convert and click Submit and wait for a couple of minutes, you'll see the progress and also if an error has occurred.
- 
- Step5: Refresh the page for another conversion.
